

SAJA QUDEIH

Software Engineer | Frontend Developer | React.js • Next.js

+970 597 805 912 [Portfolio](#) github.com/SajaJawad [LinkedIn](#)

Profile Summary

Software Engineer and Frontend Developer specializing in React.js, Next.js, TypeScript, and modern responsive web development. Experienced in building and deploying production-ready web applications, integrating REST APIs, and developing dynamic interfaces and content management systems. Strong understanding of frontend architecture, authentication, state management, and API integration, with supporting experience in Node.js, Express.js, Supabase, and MongoDB.

Professional Experience

Freelance Frontend Developer

Jan 2025 – Present

Self-Employed

Remote

- Develop responsive web applications and client-facing interfaces using React.js, Next.js, TypeScript, JavaScript, and Tailwind CSS.
- Build reusable component-based interfaces, integrate APIs and backend services, and adapt applications across mobile, tablet, and desktop.
- Work directly with clients to understand requirements, incorporate feedback, and deliver web solutions through production deployment.
- Handle frontend implementation, API/backend integrations when required, manual feature testing, and Vercel deployment.

Up-Lancer

Dec 2024 – Feb 2025

Frontend Development Trainee

Palestine

- Completed hands-on frontend development tasks using React.js, JavaScript, and Tailwind CSS, building responsive interfaces from provided Figma designs.
- Translated UI designs into reusable React components with close attention to spacing, typography, layout accuracy, and cross-device responsiveness.
- Integrated REST APIs using Axios and used Postman to test endpoints, inspect responses, and troubleshoot integration issues.
- Used Git and GitHub for version control and performed manual feature and responsive testing before task delivery.

Education

University of Palestine

2020 – 2025

Bachelor of Science in Software Engineering

Palestine

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Technologies: React.js, Next.js, Tailwind CSS, Responsive Web Design

State Management: Redux Toolkit, React Context API

Backend & Databases: Node.js, Express.js, Supabase (PostgreSQL, Storage, Realtime), MongoDB, Mongoose

APIs & Data: REST APIs, Axios, Next.js Server Actions

Authentication: JWT Authentication, Protected Routes, Session Persistence

UI Libraries & Design: Shadcn UI, Radix UI, Framer Motion, Recharts, Figma

Tools & Platforms: Git, GitHub, Postman, Vercel, Vite

Integrations: Cloudinary, Supabase Storage, WhatsApp Integration

AI-Assisted Development: Cursor, ChatGPT, Claude, Gemini, v0

English ●●●●●

Projects

SubSec | Corporate Website & Custom CMS

Tech Stack: Next.js, React.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Zod, Framer Motion, Radix UI

- Independently developed and delivered a production corporate web platform and custom Admin CMS using Next.js App Router, React, TypeScript, Tailwind CSS, and Supabase.
- Built administrative CRUD workflows for managing website content, solutions, products, distributors, customer inquiries, and image/video media.
- Implemented Next.js Server Actions with Zod validation, Supabase PostgreSQL persistence, cloud media storage, and dynamic WhatsApp lead routing.
- Worked directly with the client from requirements and design direction through feedback iterations, manual QA, deployment, and production delivery.

E-Commerce Clothing Store | Full-Stack E-Commerce App

Tech Stack: React.js, JavaScript, Tailwind CSS, Node.js, Express.js, MongoDB Atlas, Mongoose, JWT, Stripe, Cloudinary

- Independently developed a responsive full-stack e-commerce application with customer-facing shopping flows and an administrative dashboard.
- Implemented product discovery, search and filtering, cart and quantity management, wishlist functionality, authentication, checkout, and customer order tracking.
- Built a Node.js and Express.js backend with MongoDB Atlas, Mongoose, REST APIs, JWT-based authentication, and administrative product and order management.
- Built an Admin Dashboard with Multer and Cloudinary image uploads and implemented automatic order-status updates through periodic API polling.
- Integrated Stripe Checkout and Cash on Delivery as checkout options within the purchasing workflow.

Expense Tracker | Full-Stack Finance App

Tech Stack: React.js, Vite, Tailwind CSS, Node.js, Express.js, Supabase PostgreSQL, JWT, Axios, Recharts

- Independently designed and developed a responsive full-stack personal finance application for managing income and expenses.
- Implemented JWT authentication, login/logout, persistent user sessions, protected routes, and authenticated API workflows.
- Built REST API workflows for financial records and integrated the React frontend with Node.js, Express.js, and Supabase PostgreSQL.
- Developed financial data visualizations using Recharts, profile image upload functionality, and Excel report export.
- Performed manual feature and responsive testing across authentication, financial CRUD workflows, charts, profile functionality, and production deployment.

Courses & Training

- **React.js Course** – Al-Riyadh Training & Development Company, 2023
- **Front-End Developer Course** – Vision Plus Company, 2022
- **Java Programming Certificate** – AIREIADY Training, 2021
